

TONY NEATE

Secrets of Planet Earth

This astounding book manages to cover the full scope of history from a spiritual perspective, from the early forms of planetary life through Atlantis, Pharonic Egypt, Ancient Greece right up to the present day. It reveals the awkward truth about the black races, and gives the facts about the life of King Arthur. It explores new concepts of good and evil in such a convincing way, that any religion hoping to survive should urgently consider them. It delves into the esoteric life of Jesus and it explains the purpose of the Earth mother, Gaia. It looks at genetic engineering and global warming.

The aspirations of the spirit of mankind are laid starkly alongside the current reality. It is an optimistic book, yet it does not shirk a clear appraisal of our short-comings. No serious student of the true purpose of existence should miss out on these revelatory teachings.

Gifts of the Spirit: Trance Channelling

Fifty years ago there were only a few mediums channelling spiritual philosophy. Today many people are claiming to be a channel for higher wisdom, but it requires rigorous training which few are willing to undergo.

The quality of the transmission is completely dependant on motive, and without a high degree of humility and readiness, distortions can progressively occur which are not always easy to pick.

The book carefully explains what is going on behind the scenes of trance and it details the various kinds of corruption of the gifts and how they come about. It also explains how to stay focussed on the truth.

GREG BRANSON
Serial Consciousness

Greg Branson is a quiet visionary who probes deeply into the higher planes of consciousness and those subtle realms within the Earth.

He has investigated the plans of the Godhead and observed the individual and collective patterns overseeing all lives, including those still to come. As a past-life therapist, he has helped many people unpick the tight bind of karma that builds up in the human psyche, blocking a clear view of the present reality.

Greg has uncovered these principles and taught them to small groups of dedicated seekers for over thirty five years. He now feels it is time for his vision and understanding to become widely available.
